Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claims 16, 24, and 29, and the dependent claims, the language "essentially fixed" is unclear and confusing language. What does Applicant mean by "essentially fixed"? The linearly extending means is either fixed or it is not.

Art Unit: 3636

In claim 16, On line 6, "the other end" lacks antecedent basis. On line 12, "the other profile" lacks antecedent basis. On line 13, "the at least one hinging sliding profile element" lacks antecedent basis. On line 15, why is the word "corresponding" in parentheses? Also, "said (corresponding) other profile (A)" lacks antecedent basis. These same problem exist in independent claims 24 and 29 and the dependent claims 17-23. Applicant needs to read back through the claims and correct all antecedent basis problems as well as all of the unclear can confusing language and make sure that all of the structures are defined properly and clearly.

The aforementioned problems render the claims vague and Indefinite.

Clarification and/or correction is required.
